Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 22-39 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ozaki et al. (U.S.Pat-5933478) in view of Hirose et al. (U.S.Pat-5347646).

Regarding claim 29, Ozaki teaches a method of remotely programming a portable information device (fig.2, handheld terminal device 100, col.8, lines 17-42), said device operating to wirelessly communicate in a cellular telephone system (fig.1, handheld terminal device 100, host computer 110, and base stations 130 and 140, col.7, line 61 to col.8, line 6), the method comprising:

connecting to a communication path established between (fig.1, handheld terminal device 100, host computer 110, and base stations 130 and 140, col.7, line 61 to col.8, line 6) a personal computer (fig.1, host computer 110) and said device (fig.1-2, handheld terminal device 100), said communication path including a portion comprising a wireless communication path in a cellular telephone system (fig.1, handheld terminal device 100, host computer 110, base stations 130 and 140, col.8, lines 17-42); and

receiving said digital information from the personal computer over the wireless communication path after said device is configured to receive said information (fig.1-2, and 12, col.11, line 52 to col.12, line 23).

Ozaki fails to specifically disclose configuring said device in a receive mode for receiving digital information. However, Hirsosawa teaches configuring said device in a receive mode for receiving digital information (col.7, lines 26-36). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to apply the teaching of Hirsosawa to Ozaki to provide a control system which is capable of deciding whether a person attempting operation of the computer system from a remote location by way of a public telephone is an authorized user or not.

Regarding claim 30, Ozaki and Hirsosawa further teach the method of claim 29 further comprising:

storing the received digital information into a memory (see Ozaki, fig.2, storage 104, col.8, lines 29-31, col.9, lines 30-33).

Regarding claim 31, Ozaki and Hirsosawa further teach the method of claim 29 wherein said digital information includes a personalized directory of telephone numbers (see Ozaki, fig.4, and 7, col.9, lines 11-32).

Regarding claim 32, Ozaki and Hirsosawa further teach the method of claim 31 wherein said personalized directory includes a name associated with each of said telephone numbers (see Ozaki, fig.4, and 7, col.9, lines 11-32).

Allowable Subject Matter

3. Claims 22-28 and 33-39 are allowed.

The following is a statement of reason for the indication of allowance: As the applicant stated in the remarks of the amendment filed on 5/10/2007 and 7/11/2006.

Applicant's independent claims 22 and 23: The present invention is directed to a portable information device, the independent claim identifies the patentably distinct feature "configuring means for placing said device in a receive mode for receiving said digital information from the personal computer over said wireless communication path, said communication means receiving said device information from the personal computer after said device is configured by said configuring means to receive said digital information, said communication means storing received digital information into said memory". Applicant's independent claims 22 and 33 comprise a particular combination of elements, which is neither taught nor-suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

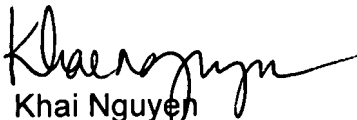

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khai M. Nguyen whose telephone number is 571.272.7923. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rafael Perez-Gutierrez can be reached on 571.272.7915. The fax phone
